September 26, 2026

Dear Nomura Recruiting Team,

I am writing to apply for the Summer Analyst 2027 — Markets / Quant, Hong Kong in Hong Kong. I am a Master of Engineering student in Financial Engineering at Cornell University (graduating December 2027) and hold a First Class Honours BSc in Mathematics with a Computer Science minor from the University of Hong Kong, making this my penultimate summer and Hong Kong my home base.

Japan's and Asia's index landscapes share the rebalancing mechanics I researched at Dymon Asia: point-in-time eligibility screens, liquidity buffers and free-float categorization, where I achieved an 82.6% action-level prediction hit rate on Hang Seng reconstitutions using only public filings.

Nomura's strength in APAC derivatives and structured markets is where my Oxford-trained stochastic modeling and Cornell financial engineering coursework compound most naturally, and Hong Kong is where I intend to build my career.

I would welcome the opportunity to discuss how my background can contribute to your team, and I am available for interviews at any time. Thank you for your consideration.

Sincerely,

Jing Xiang Xu
