September 26, 2026

Dear Barclays Recruiting Team,

I am writing to apply for the Electronic Trading Associate Summer Internship 2027 in Hong Kong. I am a Master of Engineering student in Financial Engineering at Cornell University (graduating December 2027) and hold a First Class Honours BSc in Mathematics with a Computer Science minor from the University of Hong Kong, making this my penultimate summer and Hong Kong my home base.

Electronic markets are where my experience is most concrete: at Dymon Asia I modeled index-rebalancing flows that drive predictable trading volume, and with the HKU Quant Trading Team I built a full pipeline that scans live order books, ranks opportunities, enforces position limits, submits orders and tracks realized P&L; on Polymarket — effectively a small systematic trading desk in code.

I am applying to the Hong Kong program to work on APAC electronic execution where my Mandarin and English let me liaise with regional exchanges, brokers and internal stakeholders without friction.

I would welcome the opportunity to discuss how my background can contribute to your team, and I am available for interviews at any time. Thank you for your consideration.

Sincerely,

Jing Xiang Xu
