September 26, 2026

Dear Barclays Recruiting Team,

I am writing to apply for the Quantitative Analytics Associate Off-Cycle Internship 2027 in Hong Kong. I am a Master of Engineering student in Financial Engineering at Cornell University (graduating December 2027) and hold a First Class Honours BSc in Mathematics with a Computer Science minor from the University of Hong Kong, making this my penultimate summer and Hong Kong my home base.

My training maps directly onto Quantitative Analytics work: at Nine Martingale I built a five-year factor-backtesting framework (improving annualized return by 6% and Sharpe by 0.3) and decomposed daily exposures across ten Barra style factors; at Northeast Securities I implemented Monte Carlo engines and mean-variance/risk-parity optimizers inside a 15-year daily-rebalanced backtest. At Dymon Asia I added production-grade data hygiene — point-in-time reconstruction of index methodology from HKEX filings — which is exactly the rigor model validation demands.

The six-month Hong Kong structure suits my Cornell program, and Barclays' quant culture of publishing and debating research internally matches how I work best.

I would welcome the opportunity to discuss how my background can contribute to your team, and I am available for interviews at any time. Thank you for your consideration.

Sincerely,

Jing Xiang Xu
