September 26, 2026

Dear BlackRock Recruiting Team,

I am writing to apply for the 2027 Summer Internship Program, APAC in Hong Kong. I am a Master of Engineering student in Financial Engineering at Cornell University (graduating December 2027) and hold a First Class Honours BSc in Mathematics with a Computer Science minor from the University of Hong Kong, making this my penultimate summer and Hong Kong my home base.

BlackRock's technology-first identity matches how I already work: I build auditable research pipelines rather than spreadsheets. At Dymon Asia my pipeline reconstructed Hang Seng index methodology point-in-time and hit 82.6% on constituent-change prediction; at Rivermap I automated thematic screening with a two-stage semantic retrieval system; these are the same inputs Aladdin and systematic strategies are built on.

An APAC internship would let me apply index methodology, factor analytics and AI-augmented research to the region's markets from Hong Kong, where I completed my undergraduate degree and both of my Hong Kong internships.

I would welcome the opportunity to discuss how my background can contribute to your team, and I am available for interviews at any time. Thank you for your consideration.

Sincerely,

Jing Xiang Xu
