September 26, 2026

Dear Deutsche Bank Recruiting Team,

I am writing to apply for the 2027 Summer Internship Programme — Markets & Quant, Hong Kong in Hong Kong. I am a Master of Engineering student in Financial Engineering at Cornell University (graduating December 2027) and hold a First Class Honours BSc in Mathematics with a Computer Science minor from the University of Hong Kong, making this my penultimate summer and Hong Kong my home base.

Across three prior internships I have owned research end-to-end: at Dymon Asia (HK) I predicted Hang Seng index reconstitutions with an 82.6% action-level hit rate; at Nine Martingale I repaired a dividend-event data lag that lifted information coefficient by 0.02; at Northeast Securities I built mean–variance and Monte Carlo risk-parity engines over 15 years of daily data.

Deutsche Bank's Markets franchise in Hong Kong, and its investment in electrification of flow and quant analytics in APAC, is exactly where I want to convert these skills from a fund-side seat to a sell-side one.

I would welcome the opportunity to discuss how my background can contribute to your team, and I am available for interviews at any time. Thank you for your consideration.

Sincerely,

Jing Xiang Xu
