Jing Xiang Xu

jx466@cornell.edu 115 S Quarry St., Ithaca, NY 14850 +852 6810 9521 / 607-882-5108

EDUCATION

Cornell University, College of Engineering, Ithaca, NY
Master of Engineering in Financial Engineering **Expected December 2027**

The University of Hong Kong, Hong Kong
Bachelor of Science in Mathematics with a Minor in Computer Science, **First Class Honors**, **GPA: 3.74** **June 2026**

University of Oxford, Oxford, United Kingdom
Visiting Student Program in Mathematics (ROA scholarship) **July 2025**
Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning

SKILLS

Technical: Python, C++, R, SQL, Shell scripting, Git, Linux
Quantitative: Index Rebalancing, Backtesting
AI/ML: Prompt engineering, DeepSeek-based classification and reranking, fine-tuning workflows, loop engineering

EXPERIENCE

Quantitative Researcher, *Dymon Asia Capital (HK) Limited*, Hong Kong **May to Aug. 2026**

- Researched Hang Seng Composite and Tech Index rebalancing rules to predict constituent inclusions and exclusions before official announcements, translating published methodologies into point-in-time eligibility, liquidity and buffer-selection logic validated against outcomes.
- Designed an auditable, object-oriented Python pipeline (pandas/NumPy) integrating FactSet, ERD and HKEX filings, with LLM-assisted gates and a filing-based free-float engine mapping shareholder evidence to the ten HSIL categories.
- Achieved an 82.6% action-level hit rate (185 of 224 additions and deletions) across three rebalances in leakage-controlled, point-in-time evaluation, demonstrating rigorous model validation practice.

Quantitative Researcher Intern, *Rivermap Company Limited*, Hong Kong **Feb. to Apr. 2026**

- Automated thematic stock selection by translating unstructured investment themes into supply-chain dimensions and a proprietary sector taxonomy with full auditability.
- Built a Python/Pandas pipeline integrating sector, revenue-segment and company-description data with auditable intermediate outputs and diagnostics.
- Designed a two-stage semantic retrieval pipeline (BGE embeddings, then LLM refinement) applying machine learning to classification and reranking problems.

Quantitative Strategy Analyst Intern, *Nine Martingale Investment Management, Ltd.*, Shanghai **July to Sep. 2025**

- Identified a 60-day dividend-event data lag and corrected factor alignment, raising information coefficient by 0.02.
- Built a factor-backtesting framework; improved annualized return by 6% and Sharpe ratio by 0.3 over five years.
- Analyzed daily exposures to 10 Barra style factors to quantify risk and style tilts.

Quantitative Strategy Analyst Intern, *Northeast Securities Co., Ltd.*, Shanghai **July to Sep. 2024**

- Developed mean-variance and risk-parity models within a 15-year daily-rebalanced backtesting framework.
- Implemented a Monte Carlo method approximating ERC weights by minimizing risk-contribution gaps.

PROJECTS

Researcher, *HKU Quant Trading Team*, Hong Kong **Feb. to Aug. 2026**

- Analyzed historical Polymarket data for systematic price-versus-outcome gaps, grouping contracts by topic, market structure and time to resolution; identified Yes/No shares with pricing gaps above 3 percentage points.

- Built a Python pipeline that scanned live markets, ranked opportunities, enforced position limits, submitted orders via the exchange order book, and tracked realized P&L.

Independent Researcher, *University of Oxford*, Oxford, United Kingdom **Jan. to June 2025**

- Modeled Lightning Network channel management as a discounted MDP, deriving optimal routing, liquidity-reset and channel-capacity policies under stochastic flows.
- Implemented value iteration for discrete and exponential payment distributions, demonstrating how bidirectional flows naturally rebalance liquidity and eliminate costly resets.

ACTIVITIES/INTERESTS

HKU Young Scientist Scheme; F1 racing; Texas Hold'em poker; running
