September 26, 2026

Dear Point72 Recruiting Team,

I am writing to apply for the Academy Investment Analyst Summer Internship Program 2027 in Hong Kong. I am a Master of Engineering student in Financial Engineering at Cornell University (graduating December 2027) and hold a First Class Honours BSc in Mathematics with a Computer Science minor from the University of Hong Kong, making this my penultimate summer and Hong Kong my home base.

The Academy's mission — turning rigorous, non-traditional talent into discretionary analysts through structured training — fits me precisely. My edge is building data-driven research where none exists: at Dymon Asia I predicted Hang Seng constituent changes with an 82.6% action-level hit rate before official announcements; at Rivermap I automated thematic stock selection by translating unstructured themes into supply-chain dimensions with embedding-based retrieval; with HKU's quant trading team I ran a live Polymarket book and tracked realized P&L;

I read markets probabilistically (poker, prediction markets) and build my own tooling (Python, LLM-assisted research pipelines). I want to sharpen that raw material into fundamental investing judgment under the Academy's mentors, in Hong Kong, where I already live and work.

I would welcome the opportunity to discuss how my background can contribute to your team, and I am available for interviews at any time. Thank you for your consideration.

Sincerely,

Jing Xiang Xu
