October 31, 2026

Dear Recruiting Team,

I am writing to apply for the Internship for Trading & Quant (Summer 2027), Hong Kong in Hong Kong. I am a Master of Engineering student in Financial Engineering at Cornell University (graduating December 2027) and hold a First Class Honours BSc in Mathematics with a Computer Science minor from the University of Hong Kong, making this my penultimate summer. Hong Kong is my home base and I hold an IANG visa with unrestricted work rights through July 2028.

Bastion trades global markets, including digital assets, with an entrepreneurial, employee-owned culture — the environment where my self-built edge compounds fastest. With the HKU Quant Trading Team I traded Polymarket live: researching systematic mispricings, then building the Python pipeline that scanned order books, ranked expected value, enforced position limits and tracked realized P&L; around the clock — crypto-adjacent markets reward exactly that always-on, own-your-book mentality. At Dymon Asia I predicted Hang Seng index reconstitutions with an 82.6% hit rate from public filings alone.

A founder-and-team-capital prop firm gives interns real responsibility early; my record shows I take it: every role I have held (Dymon Asia, Rivermap, Nine Martingale, Northeast Securities) ended in a measurable, deployed improvement. I am a First Class Honours HKU mathematics graduate, now at Cornell financial engineering, based in Hong Kong with an IANG visa through July 2028.

I would welcome the opportunity to discuss how my background can contribute to your team, and I am available for interviews at any time. Thank you for your consideration.

Sincerely,
Jing Xiang Xu
