Hong Kong · jx466@cornell.edu · +852 6810 9521 (HK) · IANG visa, valid through 30 July 2028

October 31, 2026

Dear Recruiting Team,

I am writing to apply for the Campus Quantitative Trader (Intern), Hong Kong in Hong Kong. I am a Master of Engineering student in Financial Engineering at Cornell University (graduating December 2027) and hold a First Class Honours BSc in Mathematics with a Computer Science minor from the University of Hong Kong, making this my penultimate summer. Hong Kong is my home base and I hold an IANG visa with unrestricted work rights through July 2028.

Jump asks for candidates who think probabilistically and want to trade from Hong Kong or Shanghai long term — both describe me exactly. On the HKU Quant Trading Team I ran a live systematic book on Polymarket: researching systematic price-versus-outcome gaps, flagging contracts mispriced by more than three percentage points, then letting a Python pipeline scan live markets, rank expected value, enforce position limits and book realized P&L.; Prediction markets are the purest trading laboratory there is — every position is a probability judgment, settled by ground truth.

My supporting toolkit comes from fund-side research: at Dymon Asia I forecast index-driven flows with an 82.6% hit rate; at Nine Martingale I improved a factor backtest's Sharpe by 0.3. I am a native Mandarin speaker with fluent English, an HKU mathematics graduate, and I hold an IANG visa that lets me live and work in Hong Kong through July 2028 — I intend to build my trading career here, in the market your posting names.

I would welcome the opportunity to discuss how my background can contribute to your team, and I am available for interviews at any time. Thank you for your consideration.

Sincerely,
Jing Xiang Xu
